

## Kindergarten Kakot

Here we go!

The kindergarten of Kakot started March 2017 with 15 children of disadvantaged families, who come to the kindergarten 5 days a week between 7 and 9 in the morning.

The supervisors the enthousistic, 23-year-old Chin Lyta. She completed successfully High School and the training “Kindergarten teacher skills”.

Miss Chin Lyta with her 15 young kids. In the background is mr. Phalla, Social Worker in Kakot.

The community can pay her not more than \$25 per month. From the government, there is no support for a Kindergarten whatsoever. Therefore, the opening hours for the kindergarten are so limited. And is it not possible at the moment to have more children at the kindergarten.

At the moment, there is a lack on game and playing materials. There is no room for the teacher to prepare the program and store her belongings. Meanwhile she purchased some materials herself, which she takes home every evening. There is no locker in the classroom.

Miss Chin leaves home at 5 in the morning to clean and prepare the room before the children arrive.

The area around the building is messy, with many shrubs in which, to her displeasure, many pests live.

She does her job with a lot of energy and enthusiasm which she gets back from the children and makes her happy, that's what keeps her going.

The first sponsors for the Kindergarten and Primary school support have signed in meanwhile.

Also, general one off donations have been transferred.

The start is there.

On the website, you can find a update of the planning and new pictures of the Kindergarten and primary school.

In next newsletter, more information will follow regarding the primary school via an interview with the head of the primary school, mr. Lev Viboth
